Project Design Phase
Proposed Solution

Date	5 April 2026
Team ID	SWTID-2026-8642
Project Name	Streamlining Ticket Assignment for Efficient Support Operations
Maximum Marks	2 Marks

Proposed Solution:

Project team shall fill the following information in the proposed solution.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Assigning support tickets manually is slow and can lead to mistakes and uneven workload. This causes delays and poor customer service. A simple and efficient system is needed to assign tickets quickly and fairly.
2.	Idea / Solution description	Create a system that automatically assigns tickets to available agents. It will distribute work evenly and help resolve issues faster.
3.	Novelty / Uniqueness	This project is unique because it uses smart rules to automatically assign tickets based on agent availability and workload. It ensures fair distribution of tasks and faster response, improving overall support efficiency compared to manual methods.
4.	Social Impact / Customer Satisfaction	The system improves customer satisfaction by providing faster responses and quicker issue resolution. It also reduces workload stress on support staff by distributing tasks fairly, leading to better service quality.
5.	Business Model (Revenue Model)	The system can be offered as a subscription-based service where companies pay a monthly or yearly fee to use the platform
6.	Scalability of the Solution	The system can easily handle more users and tickets as the business grows, without affecting performance.
